

*Just add water...
and stir up the fun!*

Solex

Solex

Lasting memories start with splashy giggles and delighted laughter as your children soak up countless hours of healthy fun. You've transformed the backyard into a little piece of paradise, for you and your family. After a long working day, what could be more inviting for parents than coming home to your own pool and letting the day's tensions just wash away? From playful family fun to a romantic moonlight dip for mom and dad, a Cornelius pool offers a whole new world of rejuvenating pleasure.

Built tough, built to last

Our critical commitment to quality starts with the materials we use and the state-of-the-art manufacturing we employ. There are three integral components—the wall, frame and sub-frame—that form the solid backbone of the **SOLEX** pool.

We begin with a heavy gauge 52" steel wall, which is hot-dip galvanized and provided with additional weather protection through the application of a polyester "Weatherizer" paint coating. Over this layer we apply an attractive wall pattern and top it off with our tough "Krystal Kote®" finish, to protect from weather elements and pool chemicals.

The cognac colored pool frame consists of 6-inch steel ledges and posts—both protected with polyester paint and a clear "Krystal Kote®" finish. Three-piece resin caps firmly lock the frame together, to form a strong structural support.

Our sub-frame features double rolled steel tracks, coupled with large, heavy gauge connectors and oversize hardware. This rigid perimeter integrates the frame and wall, creating a sturdy, unified structure.

With the addition of a colorful pool liner, you're ready to enjoy the benefits of a superior pool designed to give you years of carefree operation.

Installation made easy

If you can use a screwdriver, you can assemble a **CORNELIUS** above ground pool. We've made installation easier—no multi-sized washers or nuts to worry about. Just one large screw type is utilized to assemble all the pool elements. Plus, we provide you with step-by-step instructions and a video to help even the least mechanically inclined pool owner.

52" Round and Oval Sizes

The 52" **SOLEX** pool is available in a variety of round and A-Brace or NBS oval sizes to best suit your yard lay-out.

Form Fitting Support Cap

A-Brace Option

SIZES (Feet)
